

YASH LAL

CSE UNDERGRAD

9933281550 | vtu22360@veltech.edu.in | www.linkedin.com/in/lalyash

Computer Science student specializing in Artificial Intelligence and Machine Learning. I like figuring things out, building cool stuff, and learning as I go. I try to make the most out of every experience and enjoy working on real world problems. I'm always looking to grow and be part of work that actually makes a difference.

EXPERIENCE

NATIONAL INFORMATICS CENTER (NIC)/MeitY | Intern

July 2025- Present | Chennai

- Engineered an AI-powered women safety application with multimodal situational awareness to ensure proactive citizen protection.
- Architected a real-time emergency response framework integrating secure geo-tracking, audio intelligence, and hybrid communication protocols
- Delivered a government grade prototype aligning with national digital governance objectives.

COLLAB JUNCTION | Full Stack Development Intern

Dec 2024- Jan 2025 | Remote

- Assisted the development of the company's official website.
- Contributed to both frontend and backend tasks, collaborating closely with the core team.
- Utilized full stack development skills to build an intuitive user interface and integrated efficient backend functionality.

RELEVANT PROJECTS

Soterra: SheGuardian – Autonomous AI Women Safety Assistant App

- Developed a real-time emergency response system with multi-modal triggers
- Designed low-latency location streaming with continuous GPS tracking and hybrid communication protocol for guaranteed SOS delivery to guardians in both online and offline modes(Offline SMS fallback).
- Integrated AI-driven voice distress recognition and autonomous workflows that execute without manual intervention – alerts, live tracking, and audio evidence collection are triggered in real time.

Renal Failure Prediction using Machine Learning

- Developed a machine learning-based predictive model for the early detection of renal failure.
- Preprocessed medical datasets by handling missing values, encoding categorical data and scaling features.
- Applied Random Forest and Logistic Regression algorithm to compare accuracy and performance.

EDUCATION

Bachelor of Technology in Computer Science Engineering(AIML)

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science & Technology, Chennai (2022-Present)

High School Diploma (CBSE)

Navy Children School, Port Blair (2022)

LICENSES & CERTIFICATIONS

AWS Cloud Support Associate

Amazon Web Services

Meta Frontend Developer Specialization

Meta

Google Data Analytics Professional Certificate

Google

Google Project Management Professional Certificate

Google

GenAI in Data Analytics

Meta

Cisco Certified Network Associate (ITN | SRW | ENSA)

Cisco Networking academy

SKILLS & COMPETENCIES

Programming Languages: Java

Databases & Query Languages: SQL, MySQL

Tools & Platforms: Android Studio, VS Code, StarUML, Figma, Power BI, Google Colab, Firebase

Professional & Soft Skills: Product Management, Stakeholder Communication, Technical Communication, Adaptability & Continuous Learning

OTHERS

JPMorgan Chase & Co. – Software Engineering Virtual Internship (via forage)

- Integrated Kafka into a Spring Boot backend using IntelliJ IDEA to stream and process financial transaction data using a producer-consumer architecture.
- Executed REST API and H2 integrations; debugged Kafka message flow, and extracted transaction insights from backend logs to validate asynchronous communication.

AWS APAC Solutions Architecture Virtual Experience Program (via forage)

- Designed a simple and scalable hosting architecture based on Elastic Beanstalk for a client experiencing significant growth and slow response times.
- Described my proposed architecture in plain language ensuring my client understood how it works and how costs will be calculated for it.
